DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The rejection of claims 1-20 under 35 U.S.C. 112, second paragraph, is withdrawn in view of Applicant's amendments.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. The rejection of the claims under 35 U.S.C. 102(e) as being anticipated by Takahashi et al. (US 6709768) is withdrawn.
4. The rejection of claims 1-4 and 13-18 under 35 U.S.C. 102(b) as being anticipated by JP 1-263910 is withdrawn.
5. Claims 1-2 and 11-20 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 02/39433. (see English equivalent US 6846583 for full English translation. All column and line number references set forth herein refer to US 6846583).

Inaba et al. disclose a perpendicular magnetic recording medium having a substrate, a soft magnetic layer, an orientation control layer, a perpendicular magnetic layer and a protective

layer (see Fig 2). The reference teaches that the orientation control layer is formed from a bct material (i.e. body centered tetragonal or C11_b) and has a thickness of 5 nm – see col. 8, lines 35-65; col. 18, lines 9-26. The reference teaches that the bct material is formed from a NiAl alloy containing at least one of Ti, Ta, Zr, and Hf. See also col. 1, line 20 to col. 2, line 12.

Allowable Subject Matter

6. Claims 3-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art as applied above fails to teach or suggest a magnetic recording medium having a C11_b orientation layer formed from the claimed materials.
